

14 June 2021

Dear Valued Customer,

As of June 14<sup>th</sup>, Oneida Research Services, Inc (ORS) has acquired the IGA/RGA division of AAL; see attached press release. AAL will continue to perform other types of gas analysis (gas purity, impurities, etc.), but will no longer be analyzing integrated circuits and hermetic devices.

ORS is well known as an industry leader for Internal Gas Analysis and instrumentation; their labs are DLA approved to perform Mil-Std 883/750 - Method 1018 testing. AAL highly recommends that you work with ORS moving forward; their expertise in hermetic package gas analysis can be of great value to you and your customers. ORS has agreed to perform all IGA/RGA testing for the same prices you were paying at AAL.

Please contact ORS directly for information regarding sample shipment information and analysis. Feel free to contact Karrie Ardolino at ORS ([kardolino@orlabs.com](mailto:kardolino@orlabs.com)) or myself ([bgollob@atlanticanalytical.com](mailto:bgollob@atlanticanalytical.com)) with any other questions regarding this transition.

Thank you again for your patronage of Atlantic Analytical Laboratory, it has been a pleasure working with you.

Sincerely,

Bruce Gollob  
CEO / Managing Partner
